# INSTRUCTIONS FOR APP INSTALLS

Step 1
By default, your Android doesn't allow app installs from unknow sources. What you have to do is change the **system settings / security** as follows: **Check** the box "**Unknown sources**"

This first step is not necessary if you download the app from Google Play store. If you do that, you will automatically get the updates.

Step 2
Insert the memory card with the app and the audio files into you mobile phone.

Step 3
Go to "My Files" and
click on the app,
click on "Install", then on "Open".

Congratulations : You are ready to use the app !
